

Intro to Sugar Models (Basic Animals)

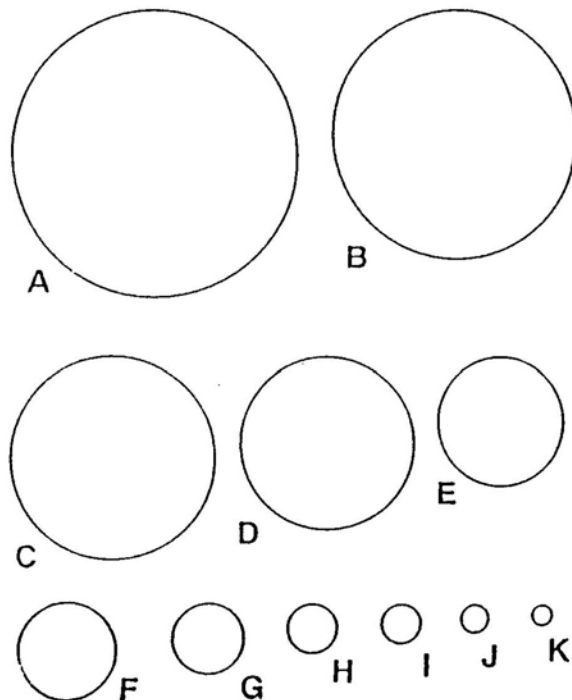

Supplies:

Modeling paste (made by kneading 1/2 teaspoon Tylose powder into 8 oz. fondant)
Paste colors
Bulbous cone tool (PME)
Uncooked spaghetti
Toothpicks
Manicure scissors, or similar
Small paintbrush
Water/gum glue

Figures could be made with regular fondant. However, modeling paste is a bit firmer and easier to work with. Keep paste airtight while working to prevent it from drying out. Tint modeling paste by kneading in small amounts of paste color.

The following Sizing Guide is provided to help you obtain proper proportions for your sugar models. Simply roll a ball of paste in your hands, and then check it against the appropriate circle on the guide. To make sugar models larger or smaller, simply move incrementally up or down on the ball sizes. For example, the mouse has a body size "C", ears size "G", tail size "G" and a nose size "K". To make a larger mouse, simply move up one size for each body part. The larger mouse would then have a body size "B", ears size "F", tail size "F", and a nose size "J".

Sizing Guide

Basic Animals									
	Body	Feet or Legs	Arms or Wings	Head	Ears	Snout	Nose or Beak	Tail	Horns
Hedgehog	B						K		
Mouse	C				G		K	G	
Pig	B	F		D	H	G		H	
Dog	B	F		D	H		J	I	
Teddy Bear	B	F	E	D	H	G		H	
Hippo	B	F	E	D	H			I	
Elephant	B	F	E	D	F			I	
Penguin*	C	H	G	E			I		
Bunny	C	F	F	E	F	I	K	I	
Giraffe	B	D	E	D	G			H	I
Sheep*	B	E		D	G			G	

*Additional parts needed

Penguin: White belly (G) White face (I)

Sheep: Top knot (I)

Bunny: Pink pads on feet (J)
